DESCRIPTION

This product is recommended for treating saline soils. It acts by adding calcium to the soil solution, which enters the clay complex freeing the sodium, facilitating the washing of the toxic ions (sodium, chlorides, etc.).

This salinity corrector reduces the undesirable effects of irrigation waters with high conductivity or with excessive sodium.

DOSES

APPLICATION TO THE SOIL:

Turf: Make weekly applications of 5 L/ha.

SALINE SOILS:

- Drip irrigation: 40-75 L/ha, during the crop cycle.
- Flood irrigation: 80-150 L/ha, during the crop cycle.

SALINE WATERS:

- 15-90 mL/m³ of water, depending on the water analysis, soil texture and kind of crop.

INCOMPATIBILITIES

Do not mix with very acidic or very alkaline products. Do not mix with sulfates nor phosphates. A compatibility test is recommended.

WARNINGS

Do not swallow. Keep out of the reach of children. Rinse skin after use. Avoid contact with skin and eyes. Do not smoke, eat and drink during its handling. Shake before use. Store at temperatures between 5° and 30 °C.
